Dear Rose Marie Moore,

As a resident of Clearlake I wish to go on record as an opponent of the Provensalia project. My strongest aversion is due to the golf course which will cause loss of trees, over-use of precious water, changes to the water quality of Cache Creek, and soil erosion. The sheer size of this project is also a huge problem in that Clearlake is not ready to absorb so many more people all at once. The infrastructure is not available and won't be for a very long time. The Cache Creek area is natural and wild. It must be preserved at all costs. To alter this area is to upset a fragile biological resource which teams with complex life. I will not be able to face the seventh generations if I do not stand up against this project which is short sighted and irresponsible. Additionally the city of Clearlake does not have the money to make up for anything that Provensalia will not be able to cover. This project could bankrupt this city completely.

Thank you for placing my opinions into the record.

Yours,

Barbara Christwitz
